

Digital Communities

Digital skills and competences of local communities in rural areas.

Program: Erasmus+ program, Key action 2 – Strategic Partnerships in the field of adult education

Project Nr: 2020-1-IS01-KA204-065807

Duration: 01.11.2020 – 31.10.2022

DIGITAL COMMUNITIES

Intellectual output 2: Virtual assistance tools for digital inclusion of seniors

This output develops a set of virtual assistance tools for senior citizens in the targeted partner countries (Iceland, Bulgaria, Spain, and Sweden): digital “roadmaps” of the online public services providing information on digital services offered in the respective country and region, and step-by-step instructions in the form of animated films guiding and educating about where to find the appropriate services for the different cases and how to use them effectively.

4 national roadmaps for Iceland, Bulgaria, Spain, and Sweden, describing a total of 47 online public services offered in these countries, are developed by the partners, designed, and digitally presented in the project website. The content includes description of each service, information’s about impact, security risks and other tips related to the service.

20 tutorials (5 per country) are under development. The tutorials are based on elder people’s real-life scenarios and need of services. Tutorials will be accessible online, suitable for direct instructional sessions and for self-learning; their design includes visually identifiable characters, simple artistic scenes, and voice-over in the native language, making the tutorials easy to follow and understand. The tutorials will be available in the project website in January 2022.

As next step, partners will validate the assistance tools with local and national stakeholders and will provide a summary validation report.
